KEYBOARD WRIST REST

Comfort through Ergonomy

Easy-to-Clean
PU Leather

Memory Foam Inside

Nonslip Base

The ELITE SHARK WR200 Wrist Rest has a seamless surface made of synthetic leather. This can be easily cleaned and offers palms and wrists stability and a pleasant hold. To especially ensure that the ball of the thumb remains free of strain, the inside of the wrist rest consists of supple memory foam. This quickly adapts to the requirements of the user, providing more comfort while gaming or typing.

KEYBOARD WRIST REST

For maximum relaxation when gaming and minimum tension of the wrists, the WR200 Wrist Rest is the ideal complement for your keyboard. This wrist rest of the ELITE SHARK series raises the position of the ball of the thumb to a height that is in line with keyboard. This ergonomic position facilitates focused gaming and typing even after hours of keyboard use.
